Hi Sarah,

I reviewed the response letter submitted in January 2009 when I returned from maternity leave and determined that IDEM's response would be on hold until we received new monitoring well data and additional quarterly reports. I either called or emailed Leena to let her know this. As we were waiting for additional quarterlies (I think the next report was submitted in October 2009), that summer was when the VC showed up in the residential wells. Everything was put on hold at that point since the EPA got involved. I'd like to wait until we receive the results from the July 2010 sampling event from the EPA in order to know how to proceed.

I'll let you know as soon as I receive the results from the EPA and forward them on.

Thanks,

Erin Brittain

Erin,

I'm hoping to get a better idea of where we stand on this and what needs to happen next. As far as I know we have gone through two rounds of comments.

Please let me know what should come next, from our end or yours.

Thanks! Call me if it's easier to discuss over the phone....

Sarah
